Note: See appendix A for an explanation of terras used.

Standard Notes: - Represents zero

(D) Withheld to avoid disclosing figures for

minerals transformed to other establishments for preparation or less minerals less establishments for preparation.

Represents expenditures during the year for both new and used plant and equipment

Represents crude ore mined, hence, not directly comparable with the value of net shipments of ores and concentrates shown in succeeding columns

Figures for cost of minerals received for preparation are included with those for cost of supplies, purchases for resale, and purchased fuels and electric energy

Represents thousands of barrels of crude petroleum, field condensate, and drins shipped or used

Figures for primary services performed in other industries are included with those for primary services by establishments classified in the specified industry.
